1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Mahuli et al. (AIChE 1997).

Mahuli teaches a calcium carbonate with pores of 5-20 nm size (see abstract).

Claims 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Morifuji (5,240,692).

Morifuji teaches a magnesium carbonate having pores, many less than 10 nm (Column 3).

Applicant's arguments filed 1/22/07 have been fully considered but they are not persuasive.

The area argued is not claimed. No differences have been shown in the substructure. Claim 10 recite nm, not angstroms as argued. It is noted that mesopores are generally 2-50 nm.

Applicant cannot define terms in a manner contrary to their accepted meaning. Claim 10 should recite the alkaline earth specie elected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
